Common experimental protocol

Planned evaluation of three configurations and an auxiliary symbolic control

Independent test commands
Same instruction IDs and equivalent domain context

Reference annotations
Ordered goals; task requirements; valid outcomes

Qwen2.5-3B + CLIPS
Goals and plan

Qwen2.5-7B + CLIPS
Goals and plan

Direct GPT
Goals and plan

Reference goals + CLIPS
Auxiliary control

Common evaluator
Goal accuracy; plan validity; reformulation consistency
Latency; run-to-run variability; resource use / API cost

Resource use applies to local Qwen runs; API cost applies to GPT.
